

We will have some tools on site to borrow, and a few sets of saw horses but if you have your own tools, please bring them. Tuning and setting up tools can be time consuming, and this greatly saves time.

So here is an extended list of tools needed for each Iqyax built in class:

- 2 sawhorses to support the Iqyax during construction
- 1 small saw mainly for cutting (small Japanese saws work fine)
- 1 small surface plane
- 1 spokeshave
- 1 hammer
- 1 pair of pliers to pull out little temporary nails
- 1 combination or tri-square
- 1 adjustable - for drawing different angles
- battery drill OR preferably a cordless drill. Light duty is fine.
- knife
- pencils
- cabinet scraper and/or sand paper
- 3x6' pieces of medium thickness rope
- 3 kayak straps
- as many little clamps as possible

Some suggestions on what to bring for attending
